

Rio Engage

from Ditto Sustainability

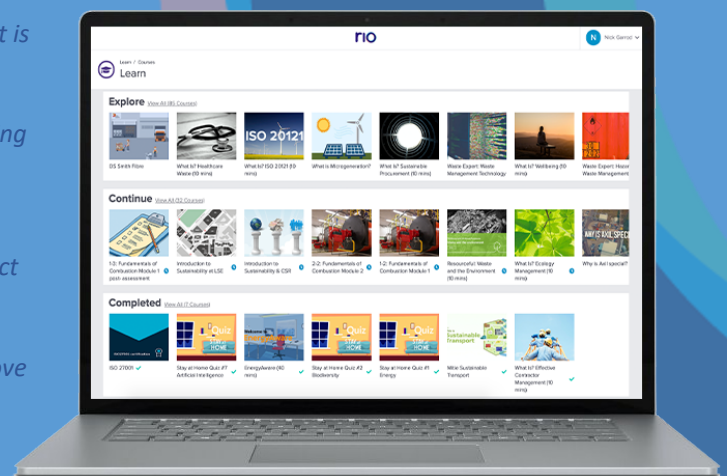

Free online learning,
resources and webinars to
help your organisation be
a more sustainable one.

..Ditto's knowledge and expertise ensures the content is relevant and easy to understand. LSE.

...(the training) has resulted in us achieving our training compliance target for this topic. NEAS.

...I found the course content to be very helpful in the way it explained the science and developed the subject in logical and easy to follow steps. Kotyk Energy.

..we saw our waste management performance improve as a result of the training. Mitie.

What is Rio Engage?

Rio Engage, provides hours of accredited, free online learning, exclusively available through our platform Rio.

The ever-increasing curated content, accredited by CPD UK and recognised by IEMA, will help you and your people to become more sustainable, through increased knowledge and longer-term behaviour change.

Free access for learners

Rio Engage is free to use as a learner; we want people and business to become more sustainable. We want to empower present and future generations with knowledge to improve the environments in which we live and work. We welcome as many people using Rio Engage as possible.

Paid access for organisations

Rio Engage is also available with additional reporting and analytics. Access to the content is still free for learners, but there is a £99 per month charge to enable the reporting dashboard for organisations to be accessed through one mentor account.

To increase learning, you can add additional paid-for and newly released content to your Rio Engage account.

Email info@dittosustainability.ai to set up Rio Engage for your organisation, or subscribe for free as a learner [here](#).
